AS1 INTEGRATED MAINTENANCE MANAGEMENT (IMM)

THE COMPREHENSIVE MAINTENANCE TOOL

The additional as1 module IMM supports the staff for planning the necessary maintenance tasks for your mixing plant. The module is entirely integrated into the as1 control system.

With IMM any maintenance work can be registered, structured and visualized. Supported are maintenance tasks with fixed time schedule as well as event-based work, which can be scheduled based on the operating hours or on the material quantities processed in the plant. Dynamic message boxes reminds the user of due maintenance work.

" With the additional as1 module IMM, the maintenance process can be sustainably optimized and simplified. This leads to lower operating costs and higher availability."
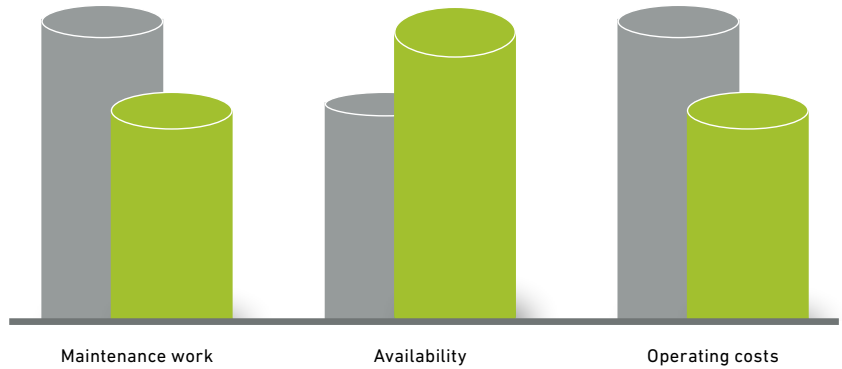

HIGHLIGHTS

- Automatic registration of operating hours and material quantities
- Planning of cyclic and event-based maintenance work
- Cost registration of maintenance work to be executed
- Integration of detailed, multi media work instructions
- List of upcoming maintenance tasks
